Foil cutting unit upgrade

Upgrade your existing foil cutting unit to a version that ITM can fully support, allowing smooth constant cutting of your foil without failure

HLP Foil cutting unit upgrade

Increase foil control whilst reducing machine wear with a foil cutting unit upgrade

Issue	• Poor foil control
Consequences	• Reduced production • Reduced product quality
Solution	• Foil cutting unit upgrade
Advantages	• A positive control with the aid of air assists and three non contacting carbide tipped knives giving a constant foil length and cutting position. • Wear is dramatically reduced with the use of angular contact bearings and non contacting knives, keeping down time to a minimum • Cast iron frame with high quality components used throughout ensures prolonged life span of the unit • New improvements reduce the complexity of setting up the cutting unit
Scope	• Complete foil cutting unit upgrade
Time required	• Approx. machine down time: 16 hours (2 working days) • Total mechanical hours: 16 hours • Total electrical hours: 2-4 hours (depending on age of machine)
Guarantee	• One year guarantee

Suitable for all HLPs
